Plate 2: Elephant proof fencing

A fence made with sisal twine and old cloth soaked in chilli and old engine oil can help keep the elephants out of crop fields

Step 1
Be sure to use protective gloves when working with chilli

Step 2
Soak old cloth in a mix of old engine oil and dry chilli powder

Step 5
Attach soaked cloths to the twine every 3m

Step 3
Soak the sisal twine in a mix of old engine oil and dry chilli powder

Step 4
Erect a fence around your field and attach 2 twine lines to poles at 1m apart and 1.5 m above the ground

Note:
You will need to re-soak the cloth every two weeks for the fence to remain effective

Plate 3: Elephants chilli coils (bombs)

Smoke from a smoldering elephant dung ball mixed with dry chilli powder can help keep the elephants out of crop fields

Step 1
Collect elephant dung as it is the best material for making chilli bombs

Step 2
Dry and crush chilli into a powder

Step 3
Mix in two handfulls of chilli powder for every two handfulls of dry dung

Step 4
Add a little water to the dry mixture

Step 5
Form the wet mixture into a ball that looks just like a elephant dung ball but with a dent on top

Step 6
After it is completely dry the chilli bomb is ready to burn by placing a hot coal in the dent
